

A close-up photograph of a bright yellow eyelash viper. The snake is coiled elegantly around a single, slender purple branch. Its body is covered in distinct, rounded scales that catch the light, creating a textured pattern. The snake's head is turned slightly to the right, its small, dark eyes looking directly at the viewer. The background is a soft, out-of-focus green, which provides a sharp contrast to the vibrant yellow of the snake.

expo POISON - GIF

New exhibition at the Museum

expo GIF expo POISON

Naturaleza Misteriosa

Naturaleza misteriosa es una muestra, única, de los seres vivos, animales y plantas, más insólitos y misteriosos que provocan en el ser humano sensaciones contrapuestas de miedo y admiración.

El objetivo es acercar al público la naturaleza más fascinante y desconocida del planeta.
